PROFESSIONAL PROFILE

Data governance and data management professional with 10+ years across Nigerian commercial banking and UK & EMEA operations, specialising in data quality, data controls, governance and system transformation.

Shapes how organisations keep control of their data through system change, setting the data standards, quality rules, acceptance criteria and ownership that Technology, Finance, Risk and business teams work to, so that reporting can be trusted, risks surface early and change goes live under control.

Most recently designed the data-quality and integrity control framework supporting a £10m+ ERP transformation across UK and EMEA operations, establishing governance controls, migration assurance and decision-ready reporting for Finance and Technology leaders.

Certified Data Management Professional (CDMP), DAMA International; completing an MSc in Business with Business Analytics at Northumbria University.

AREAS OF EXPERTISE

- **Data Governance:** Critical Data Elements (CDEs), Data Ownership and Stewardship, Data Standards and Definitions, Metadata and Lineage, Control Evidence, Data Policy Implementation
- **Data Quality, Controls & Data Risk Management:** Profiling, Data-Quality Rules, Risk Identification, Reconciliation and Control Totals, Exception Ownership, Root-Cause Analysis, Remediation Tracking
- **Transformation Assurance:** Source-to-Target Mapping, ETL Validation, Migration Readiness, UAT and Cutover Evidence, Post-Go-Live Reconciliation
- **Banking Data and Reporting:** KYC Account Controls, Customer and Transaction Data, Loan and Trade-Finance Portfolio Analysis, Management Information and KPI Design
- **Cross-Functional Governance Delivery:** Requirements Clarification, Agreement on Shared Data Definitions, Control Setting, Exception Escalation and Remediation Tracking

PROFESSIONAL EXPERIENCE

Colliers International Property Consultants (UK & EMEA)
03/2025 – Present

Data Governance & Reporting Analyst — London, UK

Scope: *Shaped data controls and go-live readiness across UK and EMEA Finance and Technology, covering ERP change, data quality, supplier and cost-centre controls, and management reporting.*

- Designed the data-quality and integrity control framework for the £10m+ finance-system migration, defining go-live readiness criteria, control evidence requirements and acceptance thresholds across Finance and Technology.
- Assured that migrated data was complete and correct through source-to-target mapping, pre- and post-migration reconciliations, ETL validation in Microsoft Fabric, metadata governance in Purview and remediation tracking in ServiceNow.
- Improved data discoverability by 40% and reduced audit evidence-gathering time by 30% by implementing business glossaries, metadata repositories, stewardship workflows, data ownership controls and end-to-end lineage for 500+ critical data elements in Collibra.
- Improved critical data-quality scores by 15 percentage points and reduced recurring data-quality incidents by 35% by implementing monitoring rules in Informatica Data Quality (IDQ) and driving root-cause remediation with data owners.
- Reduced recurring discrepancies by about 20% across 5,000+ monthly migration transactions by building automated SQL, SAS and Power Automate checks for missing, duplicate and inconsistent records, and tracing each defect to its source.
- Tightened control over £2m+ annual IT spend by strengthening master and reference-data controls across supplier, purchase-order, invoice and cost-centre workflows in SAP Ariba and Compleat, surfacing duplicate charges, misallocations and pricing variances.
- Reduced report-preparation time by 30% and improved decision-making consistency across UK and EMEA operations by standardising 15+ KPI definitions across 12+ cost centres and automating executive reporting in Power BI.

Ulite Limited
02/2021 – 12/2024

Performance & Data Analyst — London, UK

Scope: *Customer, commercial and operational data for performance reviews and business planning, working across Sales, Finance and Risk Management.*

- Made published results trusted across Sales, Finance and Risk Management by agreeing common customer, product, territory and delivery definitions, cutting recurring reconciliation exceptions by 35%.
- Developed monthly KPI dashboards for departmental managers, giving each department a consistent, regularly refreshed view of performance against agreed definitions.
- Increased action-closure rates by 30% by transforming monthly performance reporting from descriptive updates into a structured, action-oriented framework focused on root causes, business impact and accountable ownership.

- Lifted reactivation of dormant high-value accounts by 14% by segmenting 1,200+ customer accounts by value, margin, service need and attrition risk, and building differentiated action plans with Corporate Sales.
- Designed a quarterly customer and market insight framework combining qualitative and quantitative research on satisfaction, service, pricing and brand perception, feeding recommendations into annual commercial planning.
- Built rolling forecasts and scenarios from historical performance and operating assumptions, flagging emerging gaps and opportunities to management earlier.

Zenith Bank Plc
02/2018 – 01/2021

Relationship Officer
Lagos, Nigeria

Scope: *Client relationship and service role at one of Nigeria's largest commercial banks, combining customer account maintenance in Finacle with management and performance reporting across multiple branches.*

- Strengthened the reliability of branch and portfolio information used in customer and performance reviews, reducing management-report discrepancies by 25% through source-to-report validation, root-cause investigation and preventive checks at data capture.
- Standardised reporting definitions, validation procedures and supporting evidence across five branches, giving management consistent monthly performance information to act on.
- Identified concentration and emerging-risk trends across loan and trade-finance portfolios exceeding ₦1bn, enabling earlier management intervention and more informed risk-monitoring decisions.
- Administered account restrictions, Post No Debit controls and customer account maintenance in Finacle, ensuring compliance with KYC requirements, operational controls and risk-management policies.
- Analysed customer behaviour, transaction patterns and card and digital-channel usage across 10+ branches, providing evidence for product, marketing and portfolio-growth decisions.

First City Monument Bank Plc
06/2014 – 12/2017

Service Advisor
Lagos, Nigeria

Scope: *Front-line banking service role handling high-volume customer transactions.*

- Validated and reconciled high-volume transaction activity, investigating exceptions, escalating breaches and retaining evidence for review.
- Supported service operations through core system upgrades, verifying data accuracy and confirming that controls remained effective after change.

TECHNICAL TOOLKIT

- **Data quality and analytics:** SQL, SAS, Power BI, DAX, Power Query, Excel
- **Governance and metadata:** Microsoft Fabric, Microsoft Purview, Collibra, Informatica Data Quality (IDQ)
- **Workflow and evidence:** SharePoint, Power Automate, ServiceNow
- **Enterprise and finance systems:** SAP S/4HANA, Microsoft Dynamics 365 Business Central, SAP Ariba, Compleat
